Testimony:

I'd like to speak to the positives of HB05496 in our state. This bill would allow for several industries including film and entertainment/sports events to be allowed the use of simple, safe smoke bombs. As a graphic designer it is hard to add smoke effect to edit. Currently I have to do an overlay and find a photo of a smoke bomb with the right color I want for the graphic and make sure the photo has the right light. Also, as a member of the Bonanza who are the official supporters of the Hartford Athletic we know for one best supporters in the league and make a bigger jump in that area would be the cold smoke bombs. I saw those cold smoke bombs on away day in Tampa a couple years ago and said to myself. "That would make our Match day atmosphere even better.
